Started the operations in August 2011. The company is promoted by professionals, having vast experience in the field of Printing and Medical Imaging Solution sector.

Medimages is aiming to provide high quality and cost-effective Medical Imaging Print Solutions (MIPS) to Hospitals, Diagnostic Centers, Radiologists, Sonologists, Health care centers, Nuclear Medicine Centers, Mobile Health Care Centers. MIPS business module is an end-to-end solutions without any capital expenses and comprises of Medimages printer, software, Ink, Media, all maintenance, and Services. We only charge based on PER PRINT.

Benefits with us

- DICOM compatible and high-resolution color image prints
- Cost-effective and reduced operational cost
- 100% waterproof, non-tear able, instantly dry and no effect of sunlight
- Zero CAPEX, Zero maintenance and zero wastage solution
- Better efficiency
- Prompt services
- 98% reduction in power consumption, the solution can work even on inverters
- Complete MIS
- Less space

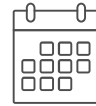

Why Choose MIPS?

Medical Imaging Print Solutions (MIPS) These systems transfer digital radiological images into physical diagnostic formats using high-resolution inkjet or laser printers rather than traditional silver halide processing. DICOM Conversion Systems: Built-in or external software that converts standard clinical communication images (DICOM) so they can be accurately printed by standard office or technical hardware. Alternative Media: Printing high-contrast diagnostic images directly onto specialized, medical-grade blue PET inkjet films or heavy-weight glossy paper. Supported Modalities: Fully compatible with MRI, CT scans, conventional X-Rays, Ultrasound, PET-CT, and Mammography.

Our Strength

01

Office Equipments

02

Medical Print Solution

03

Medical Film Importer

04

Software Development

05

ICU Equipment Importer

06

Manufacturer of
Patient Monitor, ECG Machine,
Syringe Pump

OUR INSTALLATION AT HOSPITALS

Since 2011

Nariendra Mohan Hospital
